

Project Meta Data

Project ID	IAPD-PPJ-008
Title	Exploring genetic variability and its association with growth traits in Rohilkhandi goats
User	Soniabalyan
Grant Number	Not reported in the paper
Funding Agency	ICAR-Indian Veterinary Research Institute (institutional support only; no specific external funding reported)
Description	This project investigates polymorphisms in six candidate growth-related genes (IGF1, GH1, GH2, MSTN, IGFBP3, GDF9) and evaluates their association with body weight traits from birth to 48 months in Rohilkhandi goats using PCR-RFLP genotyping and statistical association analysis.
Data Access	Open Access
Release Date	NA
Justification	NA
Project Type	Individual
Ethical Clearance	Yes
Data Sharing Plan	NA
Declaration	Yes
